Saroj Kumar Das

Full-Stack Developer experienced in building scalable SaaS applications with TypeScript, React.js, Node.js, and Express.js. Built HireLens, a role-based Applicant Tracking System featuring PostgreSQL, Prisma ORM, Redis caching, real-time notifications, and secure authentication with access and refresh token rotation. Experienced in layered backend architecture, REST API development, Docker-based containerization, and application security. Focused on building maintainable, reliable, and production-ready web applications.

WORK EXPERIENCE

Infotact Solutions

Web Development Intern — Jun 2025 - Aug 2025

- Contributed to production web applications, including **DesiEsty** (handmade products marketplace) and **HomeCook Food** (food delivery platform).
- Built **secure authentication flows**, **protected routes**, and reusable React components using **React.js**, **Redux Toolkit**, and **Tailwind CSS**.
- Integrated **REST APIs** using **Node.js**, **Express.js**, and **MongoDB** to support user management, product workflows, and seamless data exchange.
- Followed **clean architecture principles** and collaborated with cross-functional team members to deliver **maintainable** and **scalable** features.

PROJECTS

HireLens — Role-Based Applicant Tracking System — Dec 2025 - Apr 2026

- Built a full-stack SaaS ATS using **TypeScript, React, PostgreSQL, Prisma, and Redis**, with **10 Prisma models** supporting organizational hiring workflows.
- Implemented **3-role RBAC** across **58 REST API endpoints**, with JWT access/refresh token rotation, Redis-backed token blacklisting, OTP verification, and team invitations.
- Developed **8 analytics views** covering hiring pipelines, funnel conversion, candidate stages, time-to-hire, and activity tracking, alongside **real-time notifications using Socket.IO**.
- Designed a **4-layer backend architecture** (Routes 'Controllers 'Services 'Repositories) with Zod validation, Redis caching and rate limiting, Cloudinary resume uploads with PDF parsing, and **Docker containerization**.

TaskForge — Real-Time Collaborative Task Management App — Aug 2025 - Dec 2025

- Built a collaborative task management platform using **React, Node.js, Express, and MongoDB**, with **7 Mongoose models** supporting team workflows, subtasks, comments, and file attachments.
- Implemented a **4-tier permission system** across **39 REST API endpoints**, with JWT cookie-based authentication, auth-route rate limiting, and granular team-level access control.
- Developed **optimistic concurrency control** with version-based conflict resolution, a drag-and-drop Kanban board using **dnd-kit**, and smart task assignment based on team workload.
- Designed a **4-layer backend architecture** with Cloudinary uploads, a **21-event activity audit log**, **13 Socket.IO events** for real-time synchronization, and **9 Redux Toolkit slices** for state management.

SKILLS

- **Frontend:** React.js, TypeScript, JavaScript (ES6+), Redux Toolkit, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication, Zod
- **Database & Caching:** PostgreSQL, Prisma ORM, MongoDB, Mongoose, Redis
- **Real-Time:** Socket.IO
- **DevOps & Tools:** Docker, Git, GitHub, Postman, Cloudinary, Vercel, Render

EDUCATION

GIIT Professional College

Bachelor of Computer Applications (BCA) — Jul 2023 - Present

- **Coursework:** Object-Oriented Programming, Operating Systems, Database Management Systems, Software Engineering
